

## 2022 Family Care (FC) and Partnership (FCP)

### Clinical Performance Improvement Project/Chronic Care Improvement Project

REDUCE THE BLOOD PRESSURE VALUES OF MY CHOICE WISCONSIN FC AND FCP MEMBERS WITH HYPERTENSION (HTN) AND DIABETES (DM) THROUGH USE OF A SELF-MANAGEMENT TOOL (YEAR I)

The project included two goals focused on blood pressure control:

1. 85% or more of members receive education on the blood pressure self-management tool
2. Lower the % of members with high blood pressure following education on and use of the blood pressure self-management tool

Year I of the project developed valuable tools and trainings, as well as improved current clinical resources to support MCW members with blood pressure control goals. The project also gathered beneficial health equity data throughout Year I (2022) that will be applied to Year II to provide increased awareness to MCW clinical staff and support MCW FC and FCP members regarding health disparities and chronic conditions.

#### Results

##### Goal #1 - MET:

- Target: 85% or higher
- Outcome: 95.9%

Exceeded target by 10.9%

##### Goal #2 – Not Met:

- Target: 16.3% or below
- Outcome: 20.2%

*Each year we choose a project to improve the lives of our members and the care they receive. These projects are approved by the WI Department of Health Services and reviewed by a third-party external quality organization. Results are reported to the State of Wisconsin. This project will run for two years; 2022-2023*
